Rate Schedule

Version 2026.1 | Effective December 1, 2026

Stock Technologies, LLC | Grand Prairie, Texas
www.stocktechnologies.com/rates

How our rates work

We keep it simple. Everything starts from one standard rate. These rates apply to every client unless your proposal says otherwise. Work covered by a managed services agreement is included in your monthly fee. These rates are for work outside it.

Our standard rate is $175 per hour, billed in 15 minute increments.

Work types

Work type	How it is billed	Price
Remote or onsite support, during business hours	Standard rate	$175 per hour
After hours support, at your request (outside Monday to Friday, 8:00 AM to 5:00 PM Central, and on holidays)	1.5 times the standard rate	$262.50 per hour
Trip Charge (clients not on Complete IT only)	Per onsite visit	$50 per visit
Legacy Device Fee (devices more than 4 years past their warranty start date)	Per device, per month	$25 per device per month
Projects	Quoted in writing before we start	Per quote

Examples

A visit for a client not on Complete IT

We come onsite to set up a new printer. It takes an hour.

- 1 hour at the standard rate: $175
- Trip Charge: $50
- **Total: $225**

After hours work

You ask us to move a server on a Saturday so nobody is interrupted. It takes 2 hours.

- 2 hours at 1.5 times the standard rate: **$525**

Rate changes

We review these rates every January and give you at least 30 days written notice of a change. Clients on a managed services agreement see changes on their agreement anniversary, as their agreement explains.
